

# right TECHNOLOGIES

**rightBOND® Aluminum Composite Panel** is made by bonding pre-finished aluminum outer layer sheet to base aluminum sheet with a thermoplastic core. This pre-finish alu-minum coils are coated on an ISO 9000 compliant state-of-art continuous coil-coating production line with double coating and baking stations. Mainly used for external clad-ding and internal cladding, and interior surfacing panels. Its product variants are:

## rightBOND® Spectra

### rightBOND® Speciality

**Standard Sizes:**  
Thickness: 3mm, 4mm  
Width: 1220mm, 1500mm  
Length: 2440mm, 3050mm

### rightBOND® PVDF

### rightBOND® Eco

**Customized Sizes:**  
Thickness: 2mm to 10mm  
Width: Upto 1550mm  
Length: Upto 11800mm

### rightBOND® Nano

## Acrylic Sheets

Acrylic is a transparent thermoplastic that has the transparency of glass at half the weight. Acrylic are optical clarity ,weather resistance ,uv stability ,impact resistance and dimension stability. Acrylic used in signages, aquarium ,aeroplane canopies ,bathroom doors and tubs etc.

## Polycarbonate Sheets

Polycarbonate (PC) sheets boast high strengths making it resistant to impact and fracture. It also features high electrical and heat resistance. PC is a very versatile material and can be used in almost all industries. With numerous applications, rightPVC is also readily recyclable and cost effective making it in one of the most unbeatable product in the market.

It appears wherever you go. In fact, it is everywhere.”  
- Your Ideas

## rightPRODUCTS for rightAPPLICATIONS

Founded over five decades ago, just right constantly seeks to captivate these ideas everywhere. Fueled by a team of the finest engineers and professionals, we are driven by the vision of making your ideas come to life by providing the right products and right services at just the right time. As a fast-evolving, dynamic company, just right offers a wide range of products across an extensive spectrum matching international, global standards. Our mission is to create products that are adapted to varied market needs. As the largest manufacturing company in the Tax-free Jebel Ali Free Zone, our primary focus to meet all user needs and compliance.

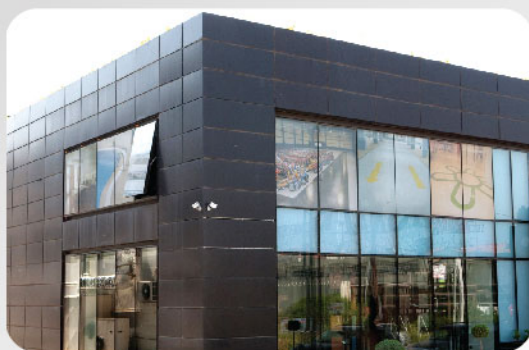

Since our inception, we began trading plastic sheets and films including Acrylic, Poly-carbonate, PVC, ABS foamed, PS, PETG and more. Making us pioneers in the industry. All plastics are structured in single to multilayer, with most of our products ready and available or produced to end user needs in our production plant based in the United Arab Emirates.

We manufacture products that adorn external building facades, interiors, claddings and other architectural applications. Our Advertising & Signage media are used in leading gas stations, banks, supermarket giants, shopping emporiums, billboards and even in vehicle graphics. Manufactured in our production plant, our Building & Construction products are developed using the most advanced cutting-edge technology. Used for structural and surface cladding, roofing, internal partitioning and interiors, our products have diverse applications and excellent features. Low maintenance and weather resistant are some of its worthy qualities. Our Safety & Security products are prominent on main traffic signs, road studs on highways and renowned corporate parks. just right manufactures unbeatable glow-in-dark signage and retro-reflective products used on traffic regulators' uniforms. Preventing possible accidents, all our Safety & Security products are designed to be durable and resistant to tough climatic conditions. We also provide customized products and designs to suit each customers specific needs.

In our production plants, we continually recycle raw materials and produce recyclable and biodegradable products. Furthermore, our production plants are ISO 9001/14001 compliant, and also designated as wide district industrial waste disposal facilities. Therefore, we can take back scraps from customers for recycling in compliance with the proper operating standards. Most of our products are available under rightECO. This range efficiently reduces wastage and uses all recycled or recyclable materials optimally. We have adopt several global measured to ensure sustainability in the communities we thrive in through our highly acclaimed and consistent CSR policies.

### right PRODUCTS

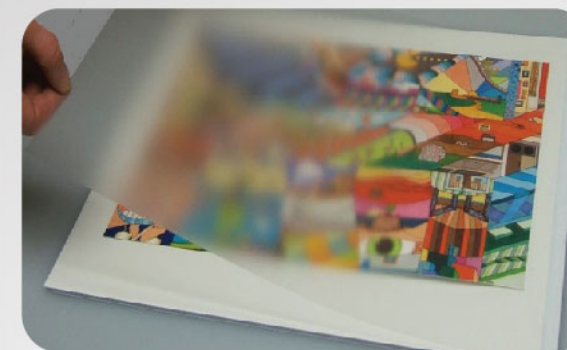

- rightBOND
- rightVISION
- rightWRAP
- rightSPECIALITY
- rightGRAPHICS
- rightLAM
- rightJET
- rightMOUNT
- rightTAPE
- rightCAL
- rightMARK
- rightSHEET
- rightBOARD
- rightGLUE
- rightSCREEN
- rightLITE

rightVISION: Complete range of perforated see thru films for visual effects to be used for digital printing for applications on window glass, available in premium as well as promotional grade.

rightWRAP: Complete range of vehicle wrapping system for digital printing and lamination with options for permanent and removable pressure sensitive adhesives. Available in different size options to optimize wastage. Also available in liners facilitating ease in application.

rightLAM: Self Adhesive cold over laminate films in glossy and matt as well as textures and floor graphics.

rightGLUE: Solvent-free adhesive composed of 100% cyanoacrylate monomer

rightBOARD: PS Foam boards extruded with non-moisture absorbing polymer for mounting graphics, exhibition panels, POP etc.

rightMARK: Engineered PVC self adhesive films for extreme using applications, gasoline resistant customized for individual specific applications.

rightLITE: Retro-reflective self adhesive films, available in engineering as well as commercial grades in colors for electro-cut and screen printing applications used for safety signs and apparel. Also available in option for digital printing with special top coating.

rightTAPE: Self adhesive single and double sided tapes available in a wide range of applications.

rightSPECIALITY: Cast and Polymeric films in white and colors for window graphics. Special effect films for decorating glass windows and partitions with sandblasted and can also be used for digital printing to generate subtle and soft images.

rightMOUNT: Clear PET film with both side optically clear adhesive covered with plicated paper liners for mounting boards and graphics.

rightCAL: Self adhesive film in over 50 standard colors, translucent and opaque types in matt and gloss surfaces for electro-cut applications

rightJET: Complete range of printing films and papers for indoor digital print applications dye or pigment based, with or without adhesives for high resolution prints.

rightSCREEN: Self-Adhesive films for screen printing
